

FOAM LOK[®] 500

Open Cell Spray Foam Insulation

Exceptional Performance in Reducing Heat Transfer

FOAM-LOK 500 is an open-cell spray foam insulation technology that is installed in interior spaces with no ignition barrier required.

Additional benefits of **FOAM-LOK 500** include noise attenuation and significant reduction in unmanaged moisture. Additionally, the product's ability to tightly seal the envelope reduces temperature fluctuations and the presence of hot and cold pockets inside, greatly enhancing indoor comfort and providing energy savings.

PROVIDING LOW
DENSITY AND
HIGH YIELD

WHY FOAM-LOK® SPRAY FOAM INSULATION?

It is essential to any operation to eliminate air infiltration, control moisture, and maintain consistent temperatures, all while reducing energy costs. **FOAM-LOK 500** Spray Foam Insulation effectively seals the building envelope, filling in any cracks and crevices.

YOUR OPTIMAL SOLUTION FOR...

- Improving energy efficiency
- Elimination of condensation
- Better indoor comfort
- Proven durability
- Maintaining consistent temperatures
- Minimizing unwanted exterior noise
- Firm adherence to framing members and substrates
- Non-emissive technology
- No mixing requirements
- No additional ignition barrier required
- New construction and retrofit applications

PROTECTION FOR THE LIFE OF THE BUILDING

FOAM-LOK 500 Spray Foam Insulation technology is the most effective insulation system to seal, protect, and insulate structures. **FOAM-LOK 500** spray foam insulation is a fully adhered, seamless barrier against the harshest of environments.
